Single Motor Installation

Single Motor Installation

Altech's UL Listed Manual Motor Controllers

General

Altech's manual motor controller is UL listed. The UL Listed mark on the MCB is the manufacturer's representation that samples of the complete product have been tested by UL to be used for most common industrial applications. This superior UL mark allows for field installation without the need for UL investigation.

A competitor's UL recognized component mark on the MCB means that the component alone meets the requirements for a limited, specific use. These MCBs are not intended for separate installation in the field, they are intended for use as a component of complete equipment submitted to UL for investigation.

The **Altech**[®] UL508 Solutions Save money and panel space!

Motor Group Installation

Altech's Manual Motor Controllers are approved for Group Installations

Field Installations
